M. CAN KIRKGÖZ

Mobile Developer - 24

🎓 EDUCATION

Yıldız Technical University – Mathematics Bachelor's Degree (2018-2024)

Google Play and App Academy – Flutter Certified Developer (Dec 2023 - July 2024)

42 Software School – C Programming and Algorithm Design (2022-2023)

Ibni Sina Vocational and Technical Anatolian High School - Dental Prosthesis Technology (2013 - 2017)

👤 WORK EXPERIENCE

CO-FOUNDER - FLUTTER DEVELOPER
Ternai - June 2024 – Present
- Building an AI-powered travel budgeting app with a 5-person team.
- Leading Flutter development using MVVM architecture and clean code practices.
- Managing team operations, roadmap planning, and investor meetings.

FLUTTER DEVELOPER INTERN
MoneyPay | September 2024 – December 2024
- Enhanced application performance by developing new features and optimizing existing ones for Flutter-based mobile applications.
- Built modular and scalable code structures using MVVM architecture and State Management.
- Strengthened the backend infrastructure through Firebase integration and third-party API implementations.
- Gained experience in project management and time planning by applying Agile methodologies within the team.
- Adhered to SOLID principles and clean code practices to improve code quality.

IT INTERN
Vitra Karo (Eczacıbaşı) | February 2024 – May 2024
- SAP

IT TEAM ASSİSTANT
Akbank | November 2023 – February 2024

REACT NATİVE INTERN
Fazla | August 2023 – November 2023
- Developed modular components for a stock tracking application.
- Optimized app functionality using React Native.

PROJECTS

Wedly – Wedding Planning Mobile Application
📱 Published on Google Play
- A Flutter-based app that allows couples to create shared checklists by categorizing their wedding shopping items.
- Developed using Firebase, Hive, AutoRoute, and Riverpod.
- Thanks to its offline-first architecture, it provides data access even without internet and synchronizes automatically when reconnected.
- Users can add and filter items, and manage the checklist together with their partner by creating a shared room.

Ternai
- Developed an AI-supported vacation planning mobile application with Flutter.
- https://github.com/cankirkgz/Ternai

KitHap
- A mobile application providing AI-assisted book summaries and reviews.

Yerel Gezgin
- A location-based recommendation app for travelers built with Flutter.
- https://github.com/cankirkgz/local_traveler_app
